

Rotary Screen

HONIRON has extensive experience with cleaning systems for juice and water streams relating to the cane and beet industries.

Advantages of the HONIRON Self Cleaning Rotary Screen:

- Efficiently and effectively removes particulate from mixed juice
- Internally fed rotary screen that provides efficient and dependable removal of bagacillo, sand, broken fibers, etc.
- Very low operational and maintenance costs
- Screening is continuous
- The sequential cleaning is provided by steam delivered into spray nozzles jetting onto the screens
- In addition to the efficient cleaning, the steam also provides bacterial growth control
- The rotary screen is delivered skid-mounted ready to be connected with minimum cost of installation
