

FABRICATION AND MACHINING SPECIALISTS
EXCEPTIONAL QUALITY AND COMPETITIVE PRICING

FABRICATION & MACHINING SERVICES

Honiron Manufacturing is a leading single-source provider of custom fabrication and CNC machining services. With our state-of-the-art fabrication facility and our ongoing investment in the latest processing technology, we transform client engineered drawings into finished component parts or assemblies - ready for installation or use.

All phases of manufacturing are carried out on-site, utilizing machining processes such as milling, forming, cutting, and more. Our fabrication services range from pressure vessels, production equipment, large cylindrical products to pipe work and general fabrication. We manufacture high precision products in carbon steel, stainless steel, monel, aluminum, hastelloy, nickel and alloys that achieves superior performance, quality, industry-leading reliability and delivery.

From OEMs specialized fabrication services to machining capabilities, our team of experienced engineers, fabricators and coded welders provide high-value fabrication and engineering solutions that meet our client's operational challenges with confidence and trust.

INDUSTRIES SERVED

- Sugar Industry
- Food Manufacturing
- Petrochemical & Refining
- Carbon Black
- Oil & Gas
- LNG

FABRICATION FACILITIES

- 79,000 SF Facility
- ASME "U" and "S" stamps and NBIC "R" stamp
- Custom Fabrication
- Metal & Pipe Fabrication
- Modular Skid Assembly
- Blast & Paint Shop
- Turnkey Logistics Support
- NDE Capabilities
