

TUBE BENDING SERVICES

HIGH QUALITY WORKMANSHIP AND
ADVANCED TUBE BENDING SPECIALIST

TUBE BENDING SERVICES

Honiron Manufacturing offers complete tube bending fabrication. For over 100 years, we have provided bending, coiling, and rolling services to a variety of industries including petrochemical, sugar, wood and pulp, oil and gas, and food processing. Working with all the major alloys, our products perform in some of the most demanding and corrosive environments imaginable.

Using advanced bending and hot-forming techniques specifically designed for boiler tubing, we offer precision tube bending that is uniform and error-free. Our expert tube bending technicians are highly trained to provide the most accurate bends possible. As your trusted partner, we are committed to delivering superior quality of products and services.

OUR TUBE BENDING SERVICES INCLUDE:

- Boiler Tubes
- Economizer Tubes
- Super-Heater Tubes
- 180 Degree Return Bends
- 90 Degree Elbows
- Replacement Tubes
- Generating Banks
- Loose Bent Tubes (Both Hot and Cold Bends)
- Straight Tubing
- Tube Plugs
- Swaging and Annealing Capabilities

TUBE BENDING CAPABILITIES:

- 1-3/4" Tubes can be bent from 1-3/4" to 10" Radius
- 2" Tubes can be bent from 2" to 24" Radius
- 2-1/4" Tubes can be bent from 2-1/4" to 8" Radius
- 2-1/2" Tubes can be bent from 3" to 24" Radius
- 3" Tubes can be bent from 3" to 10" Radius
- 3-1/4" Tubes can be bent from 7-1/2" to 24" Radius
